

Blekinge Conference 2007

19th - 21st september 2007

Ronneby Brunn, Ronneby, Sweden

Local Primary Health Care Inspired by Global Best Practice

Measuring and Financing the Needs

Meeting the Needs

Reducing the Needs

Researching the Needs

Department of Primary Health Care
Blekinge County Council

Our Sources of Inspiration

Barbara Starfield

Professor at Johns Hopkins University, Baltimore USA. Internationally recognised researcher on primary health care's role in reducing illness.

Founder of JHUs ACG-Case-Mix System.

Alan Pavilanis

Associate Professor, McGill University, Montreal Canada and director of the Family Medicine Training Institute, St Mary's Hospital. Alan Pavilanis will describe the Canadian model for Shared Care and how the task of primary health care has been formulated in Canada.

Robert Reid

Ass Professor at the Dept. of Preventive Care, University of Washington, Seattle and previously at the University of British Columbia, Canada. Robert Reid will focus on the chronically ill patient. He will describe both American and Canadian experiences.

Odd Arild Haugen

Senior consultant at the Directorate of Health and Social Affairs, Norway. Previously Director of Diakonerkjemmet and Rikshospitalet, Oslo.

Kate Lorig

Professor at Stanford University, California USA and Director of the Stanford Patient Education Research Center. Kate Lorig has developed the Chronic Disease Self-Management model, well-known world wide and also established in Blekinge Primary Health Care.

Svend Juul Jørgensen

Dr, Senior consultant at the Danish National Board of Health, Copenhagen. Involved in the WHO Health Promoting Hospitals project and responsible for the Danish programme for patient education.

Rod Jackson

Professor in epidemiology at Auckland University, New Zealand, Director of EPIQ, a centre for education and research in EBP (Evidence Based Practice). Rod Jackson received the 2006 Stevo Julius Award from the International Society of Hypertension, for his work in helping general practitioners assess patient risk from cardiovascular diseases.

Anders Håkansson

Professor in general practice at the Dept. of Clinical Sciences at Lund University, Sweden. Extensive experience of education in research methodology for colleagues in primary health care.

The Johns Hopkins University's 2007 European ACG-Conference Karlskrona 18th -19th September 2007

and / or

Blekinge Conference 2007, Ronneby 19th-21st September 2007

To register, book your hotel and your transport, go to:
